

April 15, 2020

We have a short update for today, Wednesday, April 15.

At the time of this message, we have no pending test results for either residents or staff. The recent tests all came back negative for COVID-19. We still have one active case of RSV on the 3rd floor.

We will continue to actively screen residents and employees. As ordered by the Medical Officer of Health we are now supplying masks to each employee for use throughout their shift. We are hopeful this will prevent the transmission from worker to resident and co-workers.

Please reach out if you have questions or if you wish to contact a resident.
