

April 29, 2020

As of today's date we have no outstanding results and no new swabs have been sent. We remain at 28 tests sent and 28 negative results for COVID-19. One employee tested on Saturday and one on Sunday both received a negative result.

We have four vacant beds above the five that have been closed to admissions. Some residents are currently being relocated in the building to make additional room on the second floor. We are constructing a secondary segregated space next to the Outbreak Unit for the new residents being admitted. Isolating residents with dementia is a challenge; a direction to stay in your room may not be understood. This separate area will ensure the residents are maintained in an area away from others. Once they complete the 14 days of isolating, they will be moved to their permanent rooms.
