

May 12, 2020

We have had a staff member (who was tested by public health due to symptoms) test positive for COVID-19 virus. Thankfully, this staff member has not been at Saint Vincent's for at least six weeks so there is no risk to fellow staff members or residents. We are happy to report they are improving. We have no residents exhibiting symptoms.

Mother's Day was a success at Saint Vincent's. There were approximately 70 bouquets of flowers delivered on Friday which made us look like our own flower shop. Please be sure to visit our Facebook page for a link to the video of many ladies showing your flowers and their smiles.

The effort to keep COVID-19 out of Saint Vincent's continues to be our priority. I am very proud of the effort being made by the employees at Saint Vincent's. Please know that we have wonderful staff who continue to come to work every day during this pandemic. They are taking every precaution necessary to maintain a safe working environment for staff, and a safe home for residents.
